

# Introduction of mediq Innovation Experts

Company presentation  
June 2021

# We have successfully helped innovators technologies to assess market potential and enter European health markets

mediq Innovation Experts GmbH: overview and approach

## Finding Partners

We provide you with suitable partners for a vast number of needs within the value chain, including engineering and production.

## Optimizing Strategy

We offer you our expertise in optimizing your clinical strategy, business model, pricing and financing strategy.

## Reiterate Technology

We help you to reiterate your technology and product to the needs of the German and European markets, together with our vast network of key opinion leaders.

## Financial Advisory

We support you on all investment issues: valuations, equity pitches, investor roadshows and investor relations. And of course, we often help to orchestrate a good exit for founders.

For 15 years mediq has been enriching the health market

55

market entry projects for international med-tech startups and life sciences companies

In 15 years mediq achieved a success rate of 94,3%

# In the past 15 years, we have successfully guided 55 market entries for international med-tech startups and life sciences corporates

## Work examples

---

### 1 Fast tracking reimbursement for new homecare device

We developed a reimbursement strategy for a new MedTech homecare device, by focusing on systemic deficits in current treatments. The fast acceptance by leading insurers allowed the company to start commercializing its technology.

---

### 2 Innovative business model for cell therapy manufacturing

We worked with a NASDAQ-listed Biotech company to design a business model for their point-of-care cell therapy manufacturing technology, including co-development and license sharing of innovative therapies. The strong customer value proposition drove the subsequent rollout at world leading sites in US and Europe, positively impacting shareholder value.

---

### 3 Early sales for eHealth startup

We created a market entry strategy for an Israeli voice analytics start-up, including identification of foothold segments and early adopters. A strong socioeconomic value case helped us win investment from German health insurers, accelerating time to first revenue for the company.

---

### 4 Pivoting an AI analytics startup

We led a crucial pivot for Norwegian AI analytics startup, by creating a spinoff product and new business model. The new product's value proposition was embraced by hospitals, and our business plan resulted to new VC investment and public grants totaling €5m.

---

# We are a trusted partner of the international life science industry for clinical and business development in Europe – For over 12 years
