We are creating a roadmap to the US

Four Norwegian industry clusters are joining forces to make the entry path to the US market more visible and accessible for Norwegian companies. Together we represent over 500 companies in the Norwegian health industry.

To succeed in this mission, we need our companies involved.

How can we help you - what are your needs?

Through the USA Next project we aim to identify company needs, and develop tailored activities that prepares and introduces Norwegian companies to relevant US partners and ecosystems. Our target group are companies within the segments drugs, diagnostics, health tech and digital health.

Do you want to be a part of our journey?
