NORWEGIAN
SMART CARE

LAB

Registration, mapping, visualizing and communication of emotions in a new and innovative way

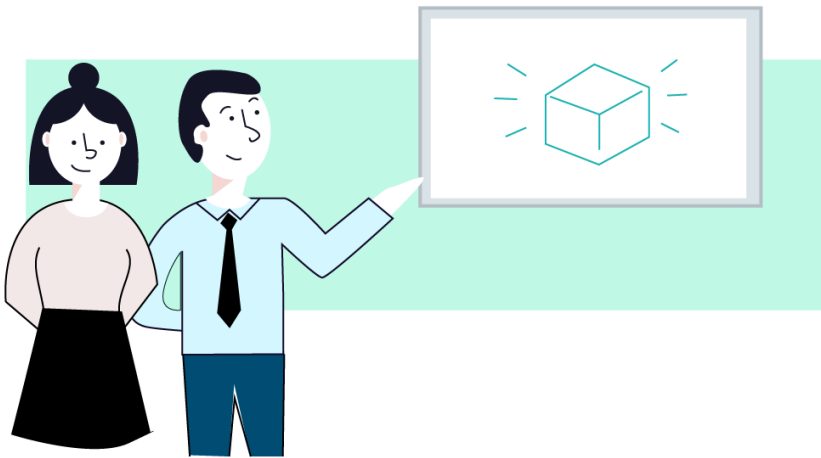

Grasp _
Supportive tool for pilot testing

A diary without words

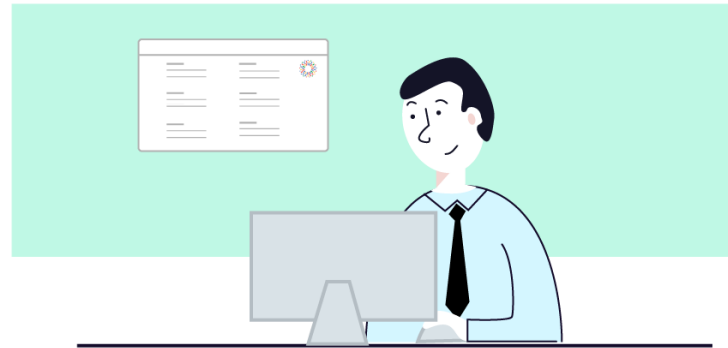

Get started

Start

Client has a great idea/product!

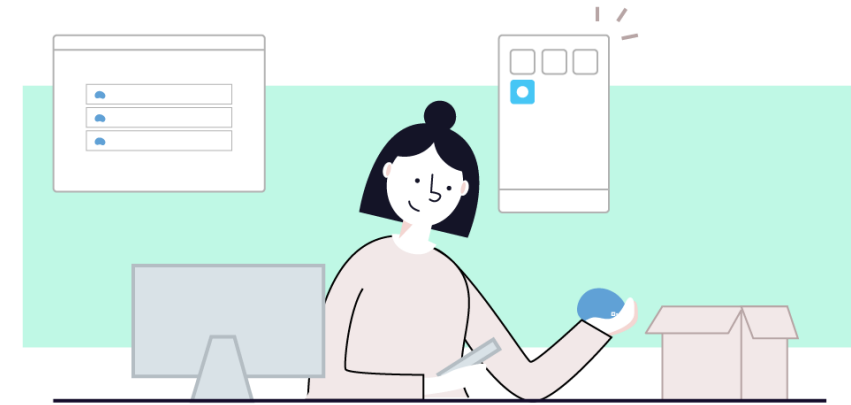

Client wants to run a pilot study or a clinical trial, for instance a «Medicine or a med.tech equipment»

The client wants to measure the effect of this idea, meaning the pilot users subjective feelings.

Finds Grasp service package through NSCL.

Orders the package

Receives Grasp units and manuals.

Sends the Grasp units and descriptions to participants in the pilot study

Engage users

Use as a supportive tool

Participant receives the «idea» and the Grasp unit

Uses the «idea».
Uses Grasp to log the effect.

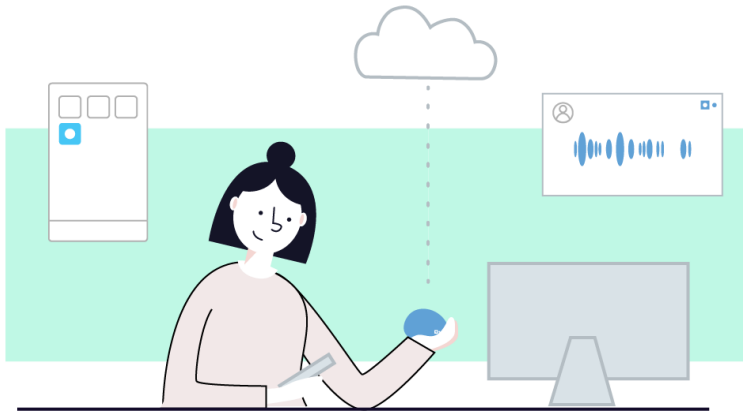

Uploads data to the cloud through Grasp Insight

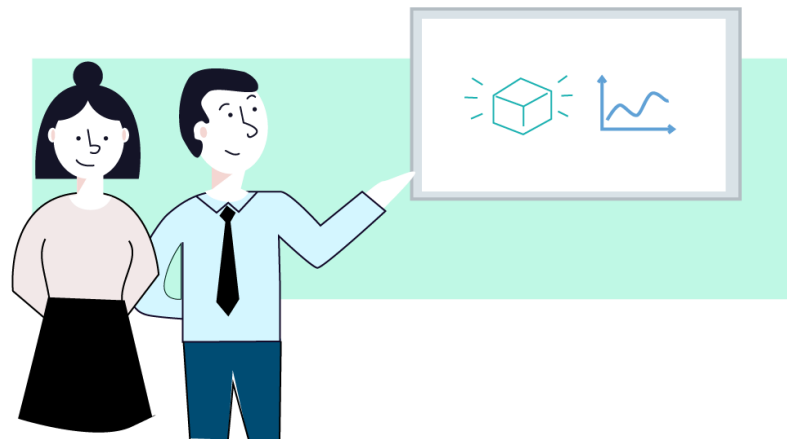

Participant can follow her own progress and comment on events, periods

Analyze

Mapping and analyzing

The client can follow up on data from users

The client can use the data as a means of:

- Adjustments
- Dialouge
- Other

The client can adjust and improve their idea based on the feedback
