# HEALTHCARE INTEROPERABILITY

Interfaces & APIs | [open.epic](https://open.epic.com)

The Epic logo is displayed in a large, white, italicized sans-serif font. The letters are bold and slanted to the right. The background of the slide features a vibrant gradient from light blue at the top to pink and purple at the bottom, with abstract geometric shapes and a bright light flare on the right side.

# Types of **Interoperability**

## Between Health Systems

### Shared Instance: Connect

Health system shares its instance with other providers in the community

### EpicCare Link

Community providers access the patient chart via a web portal

### Care Everywhere

Sends out requests (both manual and automatic) to other health systems, receives a standardized summary (C-CDA), and incorporates the new data into the patient record

### Direct Messaging

The organization that is currently seeing the patient can send the standardized C-CDA summary to another organization

## Patient-Directed Interoperability

### Share Everywhere

Patients can direct a temporary web view of their record summary to anyone in the world who has an internet connection

### Lucy

Freestanding personal health record

### Extract

Patients can obtain an extract of their data from their health systems

## Between Software & Applications

### Interfaces & APIs

Tens of billions of interface messages & API calls monthly
