

MOTITECH

Motiview er enkel og godt etablert velferdsteknologi som motiverer eldre og personer med demens til økt fysisk aktivitet.

Med 1800 filmer fra 38 land kan en dra på sykkeltur i kjente omgivelser og minner - også med musikk man liker

Leve hele livet

- en kvalitetsreform for eldre

Presents Motiview as 1 of 25 solid solutions with proof of concept to battle inactivity and increase life quality.

Implementation of Motiview in Long-Term Care Settings

As the Canadian population continues to age developing creative ways to encourage activity among older adults is vital. At Bruyère, our focus is on independence and autonomy to improve quality of life. Motiview, an innovative system developed by Motitech, has been proposed to improve cognitive stimulation and overall physical health in older adults.

Motiview:

- A motivational tool stimulates older adults to increase their physical activity and cognitive stimulation.
- Uses videos, music, and sound displayed on a TV screen, the user can take a cycling trip through familiar surroundings and memories.

Furness, ROYAL CORRESPONDENT

The Duke and Duchess of Cambridge were taken on a surprise trip down memory lane during their trip to Norway yesterday, given a video tour of their favourite spots in St Andrews.

The Royal couple, who are on their first official visit to Norway, reminisced over their old halls of residence, familiar streets and local
