# Background – Smart hospitals

Empathic Building er en moden programvareløsning, levert i 12 land over hele verden til kontormiljøer. Vi har mange store installasjoner og ser økende interesse for løsningen vår.

Vi introduserer nå Empathic Building for helsesektoren basert på eksisterende løsning og ønsker å utvide løsningen inn mot private hjem.

I fremtiden vil ikke helsevesenet ha nok hender til å utføre alle oppgavene de er tildelt, noe som krever at vi finner løsninger der vi gjør mer med færre hender. Empathic Building er en visualiseringsløsning som binder sammen alle de ulike systemene en pasient må forholde seg til i ett og samme system
